Sample Lifeguard Written Test Questions and Answers

Below are some representative questions inspired by Jeff Ellis's training content. Each question is followed by a detailed explanation to help candidates understand the reasoning behind the correct answer.

- What is the primary purpose of scanning the pool during your shift?

Answer:

To monitor all areas of the pool continuously for signs of distress or unsafe behavior, ensuring immediate response to emergencies.

Explanation:

Effective scanning allows lifeguards to detect potential dangers early. It involves systematic observation, covering every zone, and minimizing blind spots. Jeff Ellis emphasizes that constant vigilance is key to prevention and quick intervention.

- Which of the following is the correct sequence when performing CPR on an adult?

- A) Check responsiveness ? Call 911 ? Open airway ? Check breathing ? Start compressions
- B) Call 911 ? Check responsiveness ? Open airway ? Check breathing ? Start compressions
- C) Check responsiveness ? Open airway ? Call 911 ? Check breathing ? Start compressions
- D) Call 911 ? Open airway ? Check responsiveness ? Check breathing ? Start compressions

Correct Answer:

- A) Check responsiveness ? Call 911 ? Open airway ? Check breathing ? Start compressions

Explanation:

This sequence aligns with standard CPR protocols. The first step is to assess responsiveness by gently tapping and shouting. If unresponsive, immediately call emergency services (911). Then, open the airway to check for breathing. If the person is not breathing or only gasping, start chest compressions. Jeff Ellis stresses rapid response to maximize survival chances.

- During a rescue, you notice that a swimmer is struggling and appears to be panic-stricken. What is the most appropriate immediate action?

- Enter the water headfirst to reach the swimmer quickly.
- Throw a rescue tube or buoyant object to the swimmer.
- Shout for assistance and wait until help arrives.
- Dive underwater to approach from beneath.

Answer:

- Throw a rescue tube or buoyant object to the swimmer.

Explanation:

Jeff Ellis advocates for using the safest and most effective rescue methods first. Throwing a rescue device allows the swimmer to grab onto it, minimizing the rescuer's risk and conserving energy. Entering the water headfirst or diving underwater should only be done if the swimmer is in immediate danger and the rescuer is trained and confident in that technique.

- Which of the following best describes ?active drowning??

- A) The victim is panicking and trying to call for help.
- B) The victim is submerged and not breathing.
- C) The victim is struggling to keep their head above water but may still be able to assist themselves.
- D) The victim is floating calmly on their back.

Correct Answer:
